OBJECTIVE

- A result-oriented professional with over 7 years experience in web application development & enhancement, service delivery and client relationship management.
- Possess a wide range of web and software development experience using agile and waterfall methods.
- Insightful knowledge of web technologies including JavaScript and php frameworks , clouds , server management etc.
- Technology Enthusiast and easy learner of new technologies. Interested have research oriented development.
- Providing overall leadership to the entire project team including managing deliverables of other functional team leaders in an effective manner

SKILLS

Programming Languages and Frameworks

JavaScript (7+ years): Angular 2,4,5,6,7,8, AngularJS 1x, Nodejs, Express JS, React JS, JQuery, Web3.js, Underscore JS, RequireJS, Jasmine JS, Grunt JS, Gulp JS, Karma JS, Typescript, ECMA 6, D3 JS, C3 JS, Passport Js

HTML5 / CSS3 (7+ years): SCSS , LESS , Web-sockets , Canvas, Bootstrap, Material, Animations, Responsive

PHP (4+ years): CodeIgniter, WordPress, Laravel, OOP, SEO, QR code, Opencart, Ajax

Data Skills

MySQL, JSON, XML, MongoDB, Redis

Automation and Unit testing

Karma, Jasmine, grunt, gulp, webpack, angular CLI, npm, bower

Other

Scrum, Kanban, SVN, Git, GitHub, Photoshop, FTP, SSH, Linux, SEO , Agile software development methodology, Jenkins , UCD

Clouds and Containers

AWS(S3, EC2), Heroku, PCF , Docker, firebase

Tools and Applications

Rally , Jira , Zoho Projects , Basecamp , Asana , Slack , Skype

Learning Experiences

Block-chain : Distributed ledgers , smart contract , Ethereum , Solidity

Loop-back : Nodejs framework written over express and mongoose.
GraphQL : GraphQL on express server.
AWS : Lex , Server-less application

**WORK
EXPERIENCE**

Cognizant Technology Solutions

June 2016 — Present

Technology Lead

- Front-end Development Using Angular JS and Angular2+
- HTML5 , CSS3 , SASS and LESS
- NodeJS, ExpressJS and MongoDB development
- REST API development
- Working with SOAP micro services
- Integration of redis cache.
- CI/CD and cloud management
- JavaScript Unit testing Using Karma-Jasmin
- Nodejs unit testing using mocha , chai and sinon
- Project estimation and solution.
- Agile-scrum based development.
- Conducted training on angular.
- Conducting technical discussion with external candidates.

Cochin Techs and Solutions LLP

August 2015 — June 2016

Senior Web Developer

- Leading Development team
- Communication with client
- Project Analysis
- Project Estimation
- Managing Task.
- Wordpress and MySQL Programming
- PHP Application and Wordpress Plugin Development
- Wordpress Theme Development

Gresain Technologies

February 2014 — August 2015

Senior Web Developer and Team Leader

- Managing Web Project
- Leading Development team
- Communication with client
- Project discussions
- Project Analysis
- Project Estimation

- Managing Task.
- Wordpress and MySQL Programming
- PHP Application and Wordpress Plugin Development
- Wordpress Theme Development

Technocuz Software Solutions Pvt Ltd

August 2011 — February 2014

Associate Web Developer

- Wordpress and MySQL Programming
- PHP Application and Wordpress Plugin Development
- Wordpress Theme Development

EDUCATION

B-Tech in Computer Science and Engineering

September 2007 — May 2011

Kerala University / Younus College of Engineering

Obtained the B-tech Degree with 62% of aggregate.

HSE

Jun 2005 — May 2007

SNMHSS Kerala Board

Score : 85%

SSLC

jun 2004 — may 2005

NEMHSS / Kerala Board

Score : 81%

AREA OF EXPERTISE

Front end Development

- Single Page Application Using AngularJS 2+ and 1x
- Working with REST FULL APIs from AngularJS 2+ and 1x
- Creating new reusable directives
- Creating components and services
- Working with asynchronous calls and non blocking architecture
- Test driven development
- Working with events and event based communications
- Implementing browser level and application level cache
- integration of C3.js and google charts
- HTML5 development
- CSS3 , LESS and SCSS
- PSD to HTML conversion
- POC application on react js.
- Responsive website
- Parallax Animations
- Bootstrap framework
- Working with material designs
- Creating custom animation using CSS3
- jQuery based implementation
- Dom manipulation using jQuery
- Browser testing and device testing using real device and browser stack
- Dashboard Creation
- AJAX

- Integration on block-chain smart contracts with web3.js

Backend Development

- Application Development
- Node.js Development
- PHP development
- Database Design
- Database Programming
- REST Web API
- User Authentication using Passport.js.
- Express and Mongoose based application development.
- Enterprise application development.
- Working With SOAP requests
- Implementing Caching Mechanism.
- Object oriented JavaScript development.
- Learning smart contract development using Ethereum.
- WordPress Theme Development
- WordPress Plugin Development
- Custom PHP applications
- PSD to WordPress Themes
- Premium Theme or Plugin modifications
- API integration.
- Custom functional integration with wordpress.
- WordPress Admin panel Customization.
- Real Estate Portals
- Business Directory
- BuddyPress Websites
- E-commerce Website.
- Opencart and Magento Websites

LATEST PROJECTS

SoilGate - Dashboard

This is a dashboard application which manages users and devices of SoilGate. It also reads the data from SoilGate devices (firmware devices) and which will analyze for the rest of the use. We also have an analytical graph display which is created using C3.js. Here we have a REST API developed on Node.js and Express.js and data will be stored on MySQL DB. Angular5 application used for front-end along with HTML5 and SCSS.

Technologies Used : Angular5, Node.js, Express.js, MySQL, HTML5, CSS3, SCSS, KarmaJS, Jasmine JS, C3.js, bit-bucket, Plesk panel

MajorDomo - Dashboard

MajorDomo is a real-estate service provider, this dashboard application used to manage users, properties and some other features of properties. Backend developed using Node.js, Express.js and MySQL DB and front-end application was developed using Angular 5.

Technologies Used : Angular5, Node.js, Express.js, MySQL, HTML5, CSS3, SCSS, Git, Heroku, AWS

Customer 360 Dashboard - Leading Insurance Company In US

This application developed using Angular5, Node.js, MongoDB. This is a dashboard portal which collects customer details and their policy details from MongoDB. It also has some SOAP API to fetch some commonly exposed data. It was a complete development from scratch and we were following agile-scrum methodology.

Technologies Used : Angular6, NodeJS , MongoDB , ExpressJS , HTML5, CSS3, SCSS, TypeScript , Angular CLI , WebPack , KarmaJS , Jasmine JS, C3.js

Farmers FFQ - Bind Replatform

This project to create a new platform for payment processing of quote generated through farmers quote generation. Application developed on AngularJs/HTML5 & CSS3. Its end to end angularjs single page application which invoked REST API created on java platform.

Technologies Used : Angular1, HTML5, CSS3, SCSS, GruntJS , KarmaJS , Jasmine JS, C3.js

Farmers FFQ - Auto Replatform

This project to create a new platform for auto quote generation platform for Farmers Insurance. Application developed on AngularJs/HTML5 & CSS3. Its end to end angularjs single page application which invoked REST API created on java platform.

Technologies Used : Angular1, HTML5, CSS3, SCSS, GruntJS , KarmaJS , Jasmine JS, C3.js

Kutcost.com

Its a deal listing platform , here users can register and list their deals and also common users can browse , subscribe and purchase the deals. I have created both front-end and backend of this application. Also here i have created RestAPI for the application.

Technologies Used : Wordpress , WebAPI , PHP , MySQL ,HTML5 , CSS3

Matrimonial Web Portal

Custom PHP and MYSQL application. A matrimonial web portal with profile creation , profile search , profile filter , payment gateways and other basic matrimonial functions.

Technologies Used : Wordpress , WebAPI , PHP , MySQL ,HTML5 , CSS3

Real Estate Web Portal

Real Estate Web portal using WordPress. I have completed around 5 real estate website using WordPress.A complete website for real estate. user/agent registration , property listing , property search , property filter , Map integration , other basic real estate options.

Technologies Used : Wordpress , WebAPI , PHP , MySQL ,HTML5 , CSS3

Car Sale Portal

A web portal for car listing , search and advance filter on cars etc. This project is completed using Wordpress

Technologies Used : Wordpress , WebAPI , PHP , MySQL ,HTML5 , CSS3

Resume Builder

Project completed using PHP and MySQL . Here user can register and fillup there CVs , once the user completed they can make the payment and download the CVs in PDF format. Here i have used the DOMPDF library also.

BuddyPress Advance Search Plugin

A complete profile search plugin for buddypress , here admin can create the search form using the form builder , and user can search profile using dynamically build form.

Other Websites

Ecommerce website using Woocommerce , Basic blog websites , Portfolio websites , Multi user website , Business Websites etc

Other Wordpress plugins

Weather and Time wordpress plugin. DMA Management Plugin . Currency conversion plugin , Solar energy Calculator etc . And worked on some additional modification on premium plugins like Woocommerce Multivendor , Event Calendar plugin , google Map plugin.

API integrations

Google Map , Google Fonts , Google geo Location , Paypal API , Amazon Payment API , Twilio SMS gateway , Carrier rate Shipping API , etc

Responsive Websites

Responsive websites using bootstrap , naive media queries , CSS3 animations , HTML5 front-end coding.

AWARDS

Emerging Developer - Quarterly Performance Award

Awarded twice from cognizant technology solutions for extra performance on project delivery and extra contributions to digital department

Extra Mile - Extra Contribution

Awarded for extra contribution by conducting 12 day training program on Angular 6 development.

QUALIFICATIONS

- B-Tech In Computer Science and Engineering From Kerala University
- Certified on PHP and MYSQL programming from Cegonsoft Bangalore
- Certified on basic programming on C , C++ , HTML and CSS from G-tech Computer Education
- Online test on Wordpress , PHP , MySQL on elance and Odesk.
